

CONSULT · INSTALL · AFTERCARE

Consult: School M&E Design

Alliance was appointed to provide mechanical & electrical building services design by the main contractor's team for 'traditional' contract tendering rather than the 'design & build' route. The objective was to realise the client's performance specification for an extensive school refurbishment in Hull and ensure the desired quality outcome. The Scope of design works encompassed toilets, domestics, ventilation and heating together with all power, lighting, fire, security, access and data services.

Utilising industry standard software and CAD packages, Alliance ensured that the design met all standards & regulations, naturally including those pertinent to school premises and safety for all parties. Alliance checked the subsequent tenders to ensure compliance and monitored quality through to the final commissioning and handover.

- ▶ Mechanical & Electrical design
- ▶ Hevacomp, Amtech & AutoCAD packages
- ▶ Project Management
- ▶ Compliance checks

When: Summer 2016 (6 months)

Where: Priory Primary School, Hull

Imperative: guaranteed quality outcome

Result: The client's objectives were clearly realised in a successful and competitively priced project. Alliance can offer either design & build or design consultancy backed by years of assembled experience on mechanical & electrical projects. To discuss this, or your project, contact Alliance:
