

CONSULT · INSTALL · AFTERCARE

Small Works - Education: Dining Room Refurbishment

Alliance was asked to survey and report on the existing heating system at the Priory Primary School in Hull. At the time the company was already engaged in an M&E consultancy capacity by the main contractor on site as well as carrying out other enabling works. The report proved the system as uneconomical to repair and inefficient and thus it was decided to install a new.

With limited time and Alliance already being on site, DBS checked, and able to mobilise quickly, the company was employed to carry out the works installing double-panel radiators below each window alongside the corresponding services then to flush and recommission the boilers. The client was particularly happy to have dining room up and running for the new term.

- ▶ surveying & reporting
- ▶ rapid mobilisation
- ▶ LTHW & Gas Safe (commercial)
- ▶ fast-track 2-week install window

When: August 2016 (2 weeks)

Where: Priory Primary School, Hull
