FOR IMMEDIATE RELEASE  
Date: 27<sup>th</sup> January 2017

### LIDL METROPOLITAN 'STORE-ON-STILTS' Welling, London

Alliance Technical Building Services Ltd has been awarded one of the very latest Lidl concept stores in Welling London which spearhead the retailers push into urban locations. The new 'Metropolitan' concept is a *store-on-stilts* with undercroft car park offering a clean, modern local shopping facility and ample well-lit parking with travellators connecting the floors.

The design of the store encompasses much of the current 'Lidl of the future' (LOF) model, featuring a spacious layout and enhanced shopping experience with superior welfare facilities and incorporating low CO<sub>2</sub>, energy efficient building services. The 'Metropolitan' format increases both the retail and car parking space for a given plot of land.

Design work for the store and car park mechanical & electrical building services by Alliance is well underway with installation between May and September 2017.

Alliance Technical Building Services (aka Alliance) is a Midlands based Building Services contractor offering Mechanical & Electrical consultancy & design services, installation, and aftercare on commercial, health, and education projects throughout the UK.
