FOR IMMEDIATE RELEASE
Date: 10th February 2017

MIXED-USE DEVELOPMENT WITH LIDL Norwood, Croydon

Alliance Technical Building Services has begun mechanical & electrical design work for a new mixed-use project in Norwood, Croydon which encompasses 7 two-bed and 2 three-bed flats above a new Lidl supermarket with adjoining car park. The project requires BREEAM Excellent, and Alliance's installation phase is currently planned to run from May to November 2017.

This store has a suspended ceiling which is untypical of modern Lidl stores but the design still achieves a low CO2 energy efficient approach. Heating is provided by recovered heat from refrigeration plant, supplemented by the air source heat pump as required, operating alongside heat recovery ventilation. Energy efficient LED lighting is also utilized throughout the store and car park. The flats will have roof mounted PV (Photovoltaic), combination boilers and MVHR heat recovery ventilation. Alliance's remit also includes domestic services, small power, lighting security, safety, data & access services.

Alliance Technical Building Services (aka Alliance) is a Midlands based Building Services contractor offering Mechanical & Electrical consultancy & design services, installation, and aftercare on commercial, health, and education projects throughout the UK.
